

FREDRICK JONES

CODE + DESIGN

801.369.6330 · fredrick.w.jones@gmail.com · fredrickjones.com

Hello there! I'm Fred, a seasoned Frontend Developer with a passion for turning dreams into reality through code and design. With expertise in Angular, React, JavaScript, TypeScript, and SCSS, I create dynamic and user-friendly web applications. My background in design and programming allows me to craft attractive and functional frontends, always adhering to best practices with the help of ESLint and Prettier.

From leading teams and mentoring juniors to resolving bugs, I approach each task with enthusiasm and dedication. My journey spans from AngularJS to Angular v11 and React v18, and I occasionally venture into backend development with MySQL and ASP.NET. I thrive on building components and maintaining clean commit histories with Git and Azure DevOps. If you're looking for a developer who can juggle multiple technologies and bring a bit of humor to daily stand-ups, I'm here to make your frontend dreams come true!

EDUCATION

Dev Mountain

MEAN stack • March 2015
Developer Bootcamp

Utah Valley University

Bachelor of Science • August 2013
Arts and Visual Communication - Graphic Design

EXPERIENCE

Capco

Senior Consultant • FEB 2021 - MAR 2024
Huntington Bank • APR 2021 - DEC 2023
